

Do you want a beautiful Chapel on your property for a wonderful array of differing types of events, but not have it permanently structured in one place. Having flexibility of moving it if you wish.

Give Tiny Footprint a call to discuss 0499 385 398

What could a tiny Chapel be suitable for?

A range of events including weddings, naming days, remembrance days, funerals, kitchen tea parties, hen's parties, champagne events, music festivals, photo shoots or just an alternative dining space and much more.

Each tiny Chapel is purpose built to your needs, example an opening panel along one side of the Chapel can open up and become a champagne bar or food servery. You can have the windows, doors and roofline personalised to any design you like.

How big can a Chapel be and how many can it seat?

Width: minimum 2.5m to maximum 3.5m

Length : minimum 5m to maximum 12m

Seating minimum of 10 and maximum of 40 people in pew or individual seat arrangement or dinner parties depending on your seat configuration. Remembering you can use immediate area outside for extended seating or an outdoor event and using the Chapel as a backdrop.

A tiny Chapel construction please explain?

Constructed very much like a small house, timber framing and hurricane straps to the skid or trailer as your foundation. The construction is safe, insurable and assured to be of great quality.

What are the foundations of these Chapels?

You can have your tiny Chapel built on a registered trailer on wheels or on steel skids. It is a personal choice which best suits your needs.

How long does it take to build?

4 to 12 weeks dependant on the design .

What materials are used in building the Chapel?

Each design is personalised to your preferences. Recycle material or new we will work with you on what is best for your design. You may wish an ultra modern chic design, timber cladding and timber features. You may wish aluminium large expansive windows or arched cedar windows. So many variations of all materials are possible.

Is it insulated and what is the heating / cooling?

Yes, insulation is under floor, walls and ceiling and there is an optional split system for heating and cooling, there again are many options depending on your design and budget.

How does the Chapel get power or water?

Options abound! You can choose to have off grid (solar) or mains or hybrid. For water you can connect into existing tap or have a discreet under frame tank. For grey water you can use a temporary holding tank or slow seep hose disposal.

How much would a tiny Chapel cost to build?

Indicative pricing is on the reverse of this sheet. A price would be provided to you after a design consultation. This would include pricing for a trailer and skids so you could determine the best choice for you. .

Do you have options for designs we can view?

There are many pictures and designs available on the intranet for you to search and view. We are builders with design skills we can either build to a design you have found, or we can define the design in partnership with you. Putting your logo or initials onto the tiny Chapel, there are many differing design choices.

a tiny Chapel

you can do exactly the same design and size; or alter the size or create your own design and size. on a trailer or skids.

a tiny Chapel interior

this is 2.5m wide, maximum width can be 3.5m

a tiny Chapel veranda

each design can be personalised, different roof designs, veranda or no veranda or deeper veranda. Include your branding. there are so many choices for your personalised design.

Tiny Footprint provides tiny building structures that are high quality, safe, functional, and personalised to enable lifestyle dreams.

Our tiny structure builds include tiny Chapels, tiny houses and anything that is defined as tiny.

We support the process from early concept, design, council engagement (if required), site preparation, insurance, locating to its resting place, placement and of course the build.

Love Life, Live Tiny
